

WHAT YOU WILL NEED

- Cutting mat.
- Metal safety rule.
- Craft knife such as a scalpel, ACM knife, Utility knife or similar.

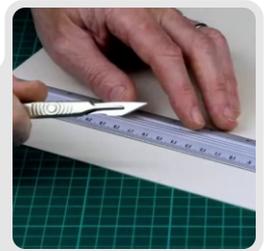

FINNBOARD

Finnboard is a wood pulp board made from the waste material when plywood is manufactured. It is an excellent sketch modelling material.

CHECK YOUR KNIFE

Use a sharp knife to cut the finnboard. A blunt knife will drag through the card and leave an uneven cut.

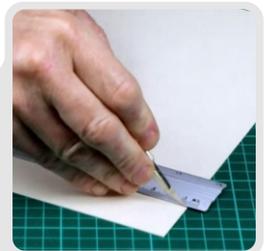

PREPARE FOR THE CUT

Place the safety rule along the cut line. Holding the knife firmly, but not gripping too hard, commence your cut.

COMMENCE YOUR CUT

Keep the knife as vertical as possible and let the blade find its way through the material.

TAKE YOUR TIME

Make as many cuts as needed to cut through the finnboard and don't rush it!
